Alternative Sewer Solutions Study

Project Highlights

- Studies wastewater treatment options for the Primary Spring Protection Zone may include:
  - Central sewer
  - Cluster disposal systems
  - Package treatment and disposal facilities.
- Estimated Cost: $2.8 million

This project would provide funding for a study to determine alternative methods of domestic wastewater treatment and disposal in the unincorporated areas, including the Primary Spring Protection Zone. These recommendations may include connection to the City of Tallahassee central sewer system, cluster disposal, system, or package treatment system options rather than on-site sewage treatment and disposal systems (septic tanks). The study may also make recommendations regarding the need for additional wastewater treatment and disposal alternatives in the unincorporated portion of the County and how those alternatives may be implemented.
